

Sanitary partition walls for Kindergartens VK13 KIGA

Made of 13 mm solid grade laminate

schäfer[®]
Trennwandsysteme

Stylish and elegant partitioning.

SAFELY TESTED

that's us!

Maximum safety and stability and the use of unbreakable materials are the basic characteristics of our sanitary products for kindergartens. The integrated finger pinch protection fulfils the safety regulations of the GUV and the TÜV-tested quality confirms the safety of our products manufactured in Germany.

RICH IN EXPERIENCES

that's us!

Bright colours, cheerful motifs and playful elements are a natural part of children's everyday lives. This is the only way for little people to learn, experience and develop. With our child-friendly toilet partition wall designs, the youngest ones are playfully immersed in exciting themed worlds. Every trip to the toilet becomes a real highlight with a learning character and joy of discovery!

HYGIENIC

that's us!

The surface finish of the materials used makes it possible to keep our KIGA WC partitions hygienically clean. Cleaning agents with disinfecting properties can be used without hesitation and also prevent the spread of dirt and germs. For hygienic and clean sanitary rooms everywhere.

EASY-CARE

that's us!

Thanks to their easy maintenance and easy cleaning, our KIGA toilet partitions are the perfect companions in everyday kindergarten life. Due to the material composition, the partition systems can be cleaned quickly and efficiently. The maintenance-free construction of our toilet partitions type KIGA speaks for itself.

BEFORE WE
EXPECT TRUST FROM
OUR CUSTOMERS,
WE PROVIDE EVIDENCE
that's us!

ENVIRONMENT & SUSTAINABILITY *that's us!*

Sustainable management and careful use of resources are a matter of course for us and part of our corporate philosophy. This basic idea is consistently integrated and lived in our work processes. We are proud to be the first certified manufacturer of partition systems and lockers in Germany to operate according to the FSC™ and PEFC guidelines.

PEFC - registered

We pay attention to a sustainable supply chain in which our products are procured under ecological, economic and socially just aspects.

FSC™ - certified

As the first certified manufacturer in the area of partition systems and lockers in Germany, we make an active contribution to the protection of our earth with this future-oriented procurement method. We supply almost our entire range from sustainable wood in accordance with the specifications of the FSC™.

On request
the products are
available with
FSC™ certification

- Made of unbreakable and easy-care nylon
- Construction in accordance with GUV safety regulations
- Colour selection according to colour chart

Finger protection:

- Finger protection on hinge and closing side in accordance with GUV safety regulations

Cubicle system

Solution for stabilisation of wide fronts

With Model VK13 Kiga the stabilising tube can be directly formed by the extension of a front profile.

Kindergarten cubicles with high front elements

Due to their low height kindergarten cubicles generally do not have a stabilising upper section.

A tried-and-tested variant is therefore the implementation of the front section at a height of 2.000 mm, so that an upper profile can be extended over the front for stabilisation purposes.

For installations with a height of more than 1,600 mm to the top edge of the door, the design shown here is mandatory.

Locking device

If required a door lock can be fitted. This is arranged in such a way that nursery staff can reach over the door to unlock it in an emergency.
